作者資格認證流程

SPRINGER NATURE

編輯接收後的流程: 作者的身份識別

協定資格基於通訊作者的所屬機構來確定

文章被編輯接收，通訊作者需要完成以下流程，在其中通訊作者將能夠進行身份識別，表明其隸屬於某個相關機構。

如果審核不通過，作者可選擇自費發表OA文章，或是以傳統的非OA形式發表文章。
欲查看符合條件的期刊列表，請查看我們的機構協議網站

Open access agreements
Information for authors

Publishing your article open access (OA) can bring you several benefits, including increased downloads and citations—and make your research more accessible to readers globally.

To help you take advantage of these benefits, many institutions cover researchers' OA publishing costs (known as article processing charges, or APCs) as part of OA agreements with Springer Nature.

Paying for OA APCs through your institution

Publishing your article through an OA agreement is the easiest route to OA for eligible authors.

Financial support for APCs

Many institutions offer financial support for researchers to pay APCs. One way is through OA agreements with publishers—either on their own or through a consortium agreement across many institutions.

Your institution's OA agreement with Springer Nature may provide:

- ✓ Full APC coverage - 100% of the APC is paid by the institution
- ✓ A percentage discount - e.g. 10% off the list price APC
- ✓ Fixed price coverage - e.g. up to €1,000 paid by the institution.

Different OA agreements include different journals

Institutions take different approaches to how they support their researchers publishing in different journals. Your institution's agreement with Springer Nature may include journals from across Springer, Nature, BMC, Palgrave, and/or Adis.

Seamlessly integrated in the publishing workflow

Getting your APC paid via an OA agreement is seamlessly integrated into the Springer Nature publishing workflows and led by you, the corresponding author. Your article will be identified as part of an agreement based on details submitted. After your article has been accepted for publication, you will be notified of your coverage options and prompted to confirm your OA licensing on behalf of all co-authors. Explore the steps in detail.

作者/文章識別

編輯接受後，通訊作者會收到完成文章出版流程的邀請，此時作者能進行身份識別：

通訊作者/文章識別參數：

1. 選定的機構
2. 電子郵件功能變數名稱識別
3. IP 識別

| Selected Institution | Institutional Email | Location |
|--|--|---|
| Please input your institutional affiliation when prompted. | Please use your institutional email address. | Please complete the form while within your Institution's network. |

識別參數按上述順序分級應用。

作者/文章識別示例

某通訊作者通過如下識別參數進行身份認證：

•例如：

- 選定的機構：University of Edinburgh
- 電子郵件功能變數名稱識別：University of Greenwich
- IP 識別：University of Vienna

→ “選定的機構”是效力最強的參數。作者將被識別為隸屬於University of Edinburgh

→ 如果沒有與最高參數相關的協定，系統將逐級向下查找，直到找到一個協議為止。
